KEYS YOU SHOULDN'T HAND YOUR AGENT · SEATTLE AI WEEK 2026

Your access checklist

Vet before you sign up. Grant less at the consent screen. Audit every month.

1 · Before you sign up (Vet)

- [ ] I know who makes it and how to contact them
- [ ] I read what it keeps, for how long, and whether it trains on my data
- [ ] I wrote down what my task needs before opening the consent screen
- [ ] It can work with read-only access to start
- [ ] It pays with one-time or limited cards, never my saved card
- [ ] It has approvals, "Allow once", an activity log and a stop button
- [ ] I can delete its memory and my account, not just disconnect
- [ ] If I host it myself, it isn't reachable from the open internet

2 · At the consent screen (Grant)

- [ ] It asks for only the apps the intro screen named
- [ ] I didn't tap "Select all"
- [ ] I unchecked send, delete and full-Drive access my task doesn't need
- [ ] I chose "Allow once" over "Allow always"
- [ ] I turned approvals on right after connecting

3 · Always ask me first

- [ ] Sending a message or email
- [ ] Spending any money
- [ ] Deleting anything
- [ ] Sharing files or location
- [ ] Changing passwords or security

4 · Never hand over

- ✕ Password manager
- ✕ Bank and brokerage logins
- ✕ 2FA and recovery codes
- ✕ ID documents (passport, license, SSN)
- ✕ Crypto seed phrases
- ✕ Admin or production access at work

5 · Every month (Audit)

- [ ] Google: myaccount.google.com/linkedapps, View by Access to › Any account access, remove what I don't use
- [ ] Microsoft: microsoft.com/consent, remove unused apps
- [ ] Inside each agent: downgrade connectors to read-only
- [ ] Turn "Always allow" into "Ask first" for sending, spending, deleting, sharing
- [ ] Make it forget: reset memory and activity, not just access
